

Hands-On Labs — PL-900 Microsoft Power Platform Fundamentals Training

Course Code: C1358

Register: <https://www.tertiarycourses.com.sg/microsoft-power-platform-fundamentals-pl-900-exam-prep.html>

These are the 15 hands-on labs for the course. Each lab has its own folder containing a README with the full step-by-step, an instruction PDF, and the mock data the lab uses.

The case study

Contoso needs a single system for employees to submit facilities and maintenance requests — broken equipment, room setup and supply orders — that the facilities team can triage, track and resolve. Each lab builds one part of that solution with a different Power Platform component.

- Store facility request and room data in a structured, secure way.
- Let employees submit requests from a phone and let coordinators manage them on a desktop.
- Notify the facilities team automatically when a high-priority request arrives.
- Report on request volume, cost and turnaround time for management.
- Answer common facilities questions with a self-service agent.
- Govern the whole thing with environments, DLP policies and solution-based ALM.

Lab catalogue

Topic 01 — Introduction to Microsoft Power Platform

Business value · connectors · DLP, compliance, privacy and accessibility (LO1 · K1, K3 · A1, A2)

Lab	Title	Duration	K / A
1	Validate the Lab Environment and Tour the Maker Portals	45 minutes	K3, A1
2	Assess the Business Case and Map Connectors to an Integration Need	60 minutes	K1, K3, A1, A2

Topic 02 — Introduction to Dataverse

Tables, columns, relationships · environments · business logic · administration (LO1 · K1 · A2)

Lab	Title	Duration	K / A
3	Build the Contoso	60 minutes	K1, A2

Lab	Title	Duration	K / A
	Dataverse Data Model		
4	Create a Related Table with Copilot and Build a Relationship	45 minutes	K1, A2
5	Environments, Security, DLP and Solution-Based ALM	60 minutes	K1, K4, A2

Topic 03 — Introduction to Power Apps

Canvas apps · model-driven apps · Copilot-assisted app creation (LO2 · K5 · A3)

Lab	Title	Duration	K / A
6	Build a Canvas App on Dataverse	60 minutes	K5, A3
7	Extend the Canvas App with a New Screen and Power Fx Navigation	60 minutes	K5, A3, A4
8	Build a Model-Driven App with Custom Forms and Views	60 minutes	K3, A3

Topic 04 — Introduction to Power Automate

Cloud, desktop and business process flows · triggers, actions, approvals (LO2 · K5 · A4)

Lab	Title	Duration	K / A
9	Build an Automated Cloud Flow with a Condition	75 minutes	K5, A4
10	Test the Flow and Diagnose a Failed Run	60 minutes	K2, K4, A5, A6
11	Approvals, Desktop Flows and Copilot-Assisted Automation	75 minutes	K1, K5, A4, A8

Topic 05 — Introduction to Power BI

Data modelling · transformation · visualisation · dashboards and sharing (LO3 · K2 · A5, A6)

Lab	Title	Duration	K / A
12	Connect, Transform and Model Facilities Data in Power BI	60 minutes	K2, A5

Lab	Title	Duration	K / A
13	Visualise, Publish and Share a Facilities Dashboard	60 minutes	K2, A5, A6

Topic 06 — Introduction to Power Virtual Agents (Microsoft Copilot Studio)

Agents and topics · knowledge · tools · publishing · troubleshooting integration (LO4 · K4 · A7, A8)

Lab	Title	Duration	K / A
14	Build a Copilot Studio Agent with Topics and Knowledge	75 minutes	K1, K4, A4
15	Add a Tool, Publish the Agent and Resolve Integration Issues	75 minutes	K4, A7, A8

Portals used

Portal	URL
Power Apps maker portal	https://make.powerapps.com
Power Automate	https://make.powerautomate.com
Power BI service	https://app.powerbi.com
Copilot Studio	https://copilotstudio.microsoft.com

See [tools.md](#) for the full documentation, mock-data and exam-preparation reference.

Getting an environment

If you do not have a Power Platform environment, join the free Power Apps Developer Plan at <https://aka.ms/PowerAppsDevPlan>. It provides a personal environment with Dataverse, Power Automate and Copilot Studio at no cost.
